Generate

Nurse - Dialog Boxes - Search Patients

- Note:
- The name links are for viewing the patients information and appointments.
  - To edit a patient's personal information, the user would have to click the Edit link
  - The form for the view patient information and edit patient information are the same form, it just depends which one is selected depends on what is shown (this can be discussed further as I am not sure if this is possible)

Welcome nurse #nurseName#!
